Review of program evaluation studies

Daniel B. Amonett damonett (at) indiana.edu

Abstract

My poster will graphically illustrate the argument made by my Qualifying Paper dealing with evaluation methodologies. My review of program evaluation literature shows a trend in the unit of analysis and scope over time of program evaluation studies. I will show how library evaluations and philanthropic evaluations fit within the larger domain of Program Evaluation, provide a matrix of evaluation literature broken down by domain and unit of analysis, and show graphically how evaluation literature has changed over time.
