2014-15
Employer Guide

www.soic.indiana.edu/career
The breadth of programs in the School of Informatics and Computing results in talented students with a range of skills to fill almost any hiring need. See below for a variety of options to help you meet your recruiting goals.

**SoIC Careers**

Create an account in our online recruiting system, SoIC Careers ([soic.indiana.edu/soic-careers](http://soic.indiana.edu/soic-careers)), to connect with students through:

**Career Fairs**

Attending a SoIC career fair is a great way to meet hundreds of potential employees. The School hosts two large career fairs each year; last fall nearly 800 job-seekers attended our fair.

**On-Campus Interviews**

If you are looking to increase your visibility with students and have a more productive recruiting season, we encourage you to schedule on-campus interviews. We offer next-day interviews following each career fair and on-campus interviews later in the semester.

**Job Postings**

Post full-time, internship, and part-time positions in SoIC Careers.

**Information Sessions**

Information sessions are traditionally held the evening prior to an on-campus interview day to give students information about your company.

**Tech Talks**

Host a tech talk and speak to students about tech-related topics and industry trends, informing our students about the latest happenings of the tech world.

**Inside the numbers with SoIC**

- **2** undergraduate majors, more than **30** cognates and **4** specializations

  Bachelor’s degrees: informatics, computer science

- **9** graduate degrees and **18** tracks and specializations

  Master’s degrees: bioinformatics, computer science, human-computer interaction design, security informatics, information science, and library science

  Ph.D. programs: computer science, informatics, information science

  Plus we offer an online certificate in data science, a graduate certificate in information architecture, a specialist degree in library and information science, and numerous dual degrees and certifications.
Looking for more chances to engage our students?

Consider one of these opportunities:

**HCID Connect**
HCID Connect is a unique opportunity for employers to recruit students in our Human-Computer Interaction Design master’s program by participating in a mini career fair, giving an “ignite-style” employer presentation, hearing from faculty, and observing students in a design challenge.

**Employer Panels**
Participate in an employer panel in one of our introductory computer science or informatics courses to help students learn more about your industry and company. Informing students about the many options available to them is one of the best ways to increase the tech talent pipeline.

**Accelerator Corporate Giving Program**
The Accelerator program is a relationship-enhancing investment opportunity that improves your company’s ability to address your specific, strategic needs.

**Mock Interview Day**
Conducting practice interviews is an opportunity for you to provide support and feedback to our students while increasing your presence at the School.

**Additional Opportunities**
- Connect with faculty liaisons
- Collaborate with student organizations
- Sponsor a case competition
- Host a site visit
- Moderate resume roundtables
- Provide shadow opportunities

We’d love to help you find the right students for your organization. Contact us at soiccareers@soic.indiana.edu to get started!
