Informatics and computer science majors in the School of Informatics & Computing may apply for any program as long as they meet the eligibility requirements (semesters of school, language background, GPA, etc). The greatest opportunity to earn upper-level credit will be on the following types of programs:

- Mainstreamed programs in English-speaking countries
  *Mainstreamed programs involve taking regular classes with host national students.*
- Mainstreamed programs that require proficiency in another language

Students can take coursework abroad that fulfills their World Languages and Culture and other general education credits. Students may also be able to take coursework towards their electives and cognate within their major, but should consult with their SoIC academic advisor.

## IU SEMESTER PROGRAMS

By choosing one of the following IU programs, students will receive comprehensive advising from Overseas Study in cooperation with major advisor(s). All programs below offer semester options only unless otherwise noted. Summer program options are listed on the summer flyers and our website.

Eligibility, housing, program dates, cost and financial aid details for each program can be found on individual program flyers available on the web at [http://overseas.iu.edu](http://overseas.iu.edu) or are available in our office.

### MAINSTREAMED PROGRAMS IN ENGLISH

Mainstreamed programs offer the widest range of courses through their university’s biology department and attract the largest number of majors. These programs also offer the best opportunity for cultural immersion.

</table>

### MAINSTREAMED PROGRAMS IN OTHER LANGUAGES

These programs require proficiency in a second language and offer different degrees of mainstreaming.

### PROGRAMS FOR U.S.-BASED STUDENTS TAUGHT IN ENGLISH OR OTHER LANGUAGES

We offer a number of programs that provide a limited selection of area studies courses that are taught exclusively for Americans. Generally one language class is required for programs that are in a country where English is not the native language. Some of the programs offer classes only in the host country’s language. Coursework taken on the programs would fulfill general education, elective, and possibly major or minor requirements.

### INTERNSHIPS

International internships are an excellent way to apply ideas and theories acquired during your courses to the professional world. A number of study abroad programs offer an internship option. Visit [http://overseas.iu.edu/programs/iuprograms/internship.shtml](http://overseas.iu.edu/programs/iuprograms/internship.shtml) for more information.

Intensive summer internships (8 weeks, full-time, 6 credits) are available in Paris, Santiago and Sydney for opportunities in information technology.
OTHER IU PROGRAMS

Additional programs are coordinated by IU departments, schools or campuses. In all cases, information about the programs (e.g. program details, credit awarded, financial aid, eligibility, deadlines, costs, application instructions, etc.) must be sought from the sponsoring unit. See http://overseas.iu.edu/programs/iuprograms/biglist.shtml.

Programs
Poland: Computer Graphic Technology (IUPUI)

NON-IU OPTIONS

Some students’ interests might not be accommodated by the options given above. Below are examples of programs beyond IU that may be of interest to SoIC students. It is the student’s responsibility to verify whether credits would be transferable to IU. See http://overseas.iu.edu/programs/non-iu for more information.

- Cultural Vistas Fellowship: http://www.culturalvistas.org/cvfellowship
- IAASTE (International Association for the Exchange of Students for Technical Experiences): http://www.iaasteunitedstates.org/intl.html
- STEM Summer Research-Sicily: http://studyabroad.arcadia.edu/find-a-program/programs-by-country/italy/ stem-summer-research-sicily/

- University of Glasgow: http://www.ifsa-butler.org/university-of-glasgow.html

AFFILIATED PROGRAMS

IU does not offer programs in every location and language, so students may choose to search from among the list of Affiliated Programs (http://overseas.iu.edu/programs/non-iu/affiliated/) and CIC Shared Programs (http://overseas.iu.edu/programs/non-iu/cic_shared/) that are administered by other institutions. These programs are endorsed by our office based on the reputation of the organizing agencies or institutions, the quality of the programs and their academic standards. Students earn transfer credit on these programs and the use of financial aid is subject to approval.

NEXT STEPS

After looking at individual flyers for programs you are interested in, visit our office and browse the program binders for more information. If you have further questions or want to speak with a study abroad advisor about academic issues, please call Overseas Study to arrange an appointment.
